Hi Ryan,

I believe the attached samples were taken from the Frac Tank by your staff to determine if

the contents can be sewered. The samples were delivered to the Sanitation Districts of Los Angeles County Laboratory by LACoFD HHMD Investigation Unit staff. Please let Fernando Florez or me know if you have any questions or need more information.

Thank you,

Tony Payne, Assistant Chief

Emergency Operations Section

Health Hazardous Materials Division

Cell: 213-215-0142

Hey buddy,

As requested. Here are the 4 sample results that Steve Carr gave me today, which all resulted below HW levels. You need to verify with the contractor (START), where the samples were taken from, to verify if they are from the Frac Tank.

Hope this helps.

Fernie.
